does a novel focus on one life or many alex woloch uses this simple question to develop a powerful new theory of the realist novel based on how narratives distribute limited attention among a crowded field of characters his argument has important implications for both literary studies and narrative theory characterization has long been a troubled and neglected problem within literary theory through close readings of such novels as pride and prejudice great expectations and le p[re]goriot woloch demonstrates that the representation of any character takes place within a shifting field of narrative attention and obscurity each individual whether the central figure or a radically subordinated one emerges as a character only through his or her distinct and contingent space within the narrative as a whole the character space as woloch defines it marks the dramatic interaction between an implied person and his or her delimited position within a narrative structure the organization of and clashes between many character spaces within a single narrative totality is essential to the novel's very achievement and concerns striking at issues central to narrative poetics the aesthetics of realism and the dynamics of literary representation woloch's discussion of character space allows for a different history of the novel and a new definition of characterization itself by making the implied person indispensable to our understanding of literary form this book offers a forward looking avenue for contemporary narrative theory

few american social programs have been more unpopular controversial or costly than aid to families with dependent children afdc its budget now in the tens of billions of dollars has become a prominent target for welfare reformers and outraged citizens indeed if public opinion ruled afdc would be discarded entirely and replaced with employment yet it persists

steven teles's provocative study reveals why and tells us what we should do about it. teles argues that over the last thirty years political debate on afdc has been dominated by an impasse created by what he calls ideological dissensus: an enduring conflict between opposing cultural elites that have largely disregarded public opinion. thus he contends one must examine the origins and persistence of elite conflict in order to fully comprehend afdc's immunity to the reform it truly needs: the kind that unites the elements of order, equality, and individualism central to the american creed. one of the first studies to analyze afdc from a new democrat position, whose welfare sheds new light on the controversial role of the courts in afdc, the rise of welfare waivers in the mid 1980s, the failure of the clinton welfare plan, and the victory of block granting over policy-oriented welfare reform, teles however goes beyond mere critical analysis to advocate specific approaches to reform. his thoughtful call for compromise built around the centrality of work, individual responsibility, and opportunity offers a means for dissolving dissensus and genuine hope for changing an outdated and ineffectual welfare system. based on interviews with participants in the afdc policymaking process as well as an unparalleled synthesis of the voluminous afdc literature, whose welfare will appeal to a wide array of welfare scholars, policymakers, and citizens eager to better understand the tumultuous history of this problematic program and how it might fare in the wake of the fall elections.

in this collection, senior scholars explore the transition from war to uneasy peace, how and why the war ended as it did, whether a different resolution was possible, and if the ensuing cold war was inevitable.

some warriors are drawn to the thrill of combat and find it the defining moment of their lives; others fall victim to fear, exhaustion, impaired reasoning, and despair. this book synthesizes the wartime experiences of american soldiers from the doughboys of world war i to the grunts of vietnam, focusing on both soldiers and marines. it draws on histories and memoirs, oral histories, psychological and sociological studies, and even fiction to show that their experiences remain fundamentally the same regardless of the enemy, terrain, training, or weaponry.

the 19th-century british writer can by no means said to be liberated from victorian patriarchal ideology, admits camus. dijon u. but she finds that his madwomen are different, more human, somehow, than his sane heroines, that indicates to her that he had a different perception of gender, even if half-conscious than his peers, and that imagination.
